

ABSTRACT OF THE DISCLOSURE

A package (1) comprising a pressure deformable container (2) and a head (3) adapted to be ruptured for the  
5 dispensing of the contained product. The dispensing head  
comprises a neck (4) secured to the container (2) and  
delimiting an orifice, and a nozzle (5) secured to the neck  
(4), the nozzle (5) and the neck (4) each comprising a  
10 bearing surface oriented radially relative to the orifice  
and adapted to be placed into contact for securement. A  
process is also provided for the production of such a  
package.
